ANTARA, which means balance, captures the inner wisdom of the body to bring about profound healing. Used for centuries in India, the Cannabis plant is a sacred form of medicine. The Vedas believed that its leaves were inhabited by a guardian angel, and associated the plant with happiness and relief from fear.

ZENTS founder Cord Coen's experience with Indian medicine was the catalyst for his own change. It was also the spark that set fire to the idea that healing is possible for us all.

ANTARA

SETTING A NEW STANDARD FOR CBD

LOCALLY GROWN

BOULDER VALLEY FARM

Organically grown in the Boulder Valley, watered with snowmelt from Colorado's highest peaks, then nurtured to full potency on an organic farm. The on-site animal sanctuary helps both the animals and the plants, naturally regulating the soil and providing food for the animals.

PURE

UNMATCHED PURITY

Our ultra-clean non-psychoactive CBD is grown without pesticides and extracted without adding harsh chemicals, solvents, or carbon dioxide, for unmatched purity.

POTENT

TRUE FULL SPECTRUM

We extract our oil from freshly cut hemp flowers on the farm right there in the field—no drying, no heat like all other processes such as CO². When you use heat on a plant it burns off some of the beneficial compounds. In our heat-free process we are able to preserve the cannabinoids, terpenes and flavonoids for maximum potency. Much like fresh, cold pressed juice, it keeps the most vital properties of the plant intact.

TRUSTED

TRANSPARENT

Dedicated to fostering trust and transparency, ANTARA is meticulously third-party lab tested and QR code labeled. We make it easy to review the cannabinoid and terpene profile and verify the purity of each product. We believe you should always feel confident that ANTARA is the very best for your body.

THE SCIENCE OF CBD

“With MORE than 65 CELLULAR TARGETS, CBD may PROVIDE a KIND of FULL-BODY MASSAGE at the MOLECULAR LEVEL.”

MOISES VELASQUEZ-MANOFF, AUTHOR
(NEW YORK TIMES MAGAZINE)

WHAT IS CBD?

Cannabidiol (kan-uh-buh-**dahy**-uhl), or CBD for short, is a chemical compound found in the Cannabis plant. While there are a number of Cannabis plant species, CBD is usually extracted from the flowers of the hemp plant.

WHAT ARE CANNABINOIDS?

“Cannabinoids” (or “phytocannabinoids”) is a term used for the group of 100+ chemical compounds found in the Cannabis plant. Each has its own properties and effects on the body that researchers are uncovering every day.

WHAT ARE TERPENES?

Terpenes are aromatic hydrocarbons found in plants. They are the reason lavender, eucalyptus, and orange have their distinct smells. Aromatherapy oils and other holistic medicine relies on the mood lifting properties of terpenes. The cannabis plant contains over 100 terpenes, with beneficial properties that work together with cannabinoids.

THE ENDOCANNABINOID SYSTEM

The human body also utilizes its own version of cannabinoids through a vast biological system called the Endocannabinoid System (ECS). ECS regulates important processes in the body including pain, mood, stress, and sleep in order to maintain perfect balance—homeostasis.

HOMEOSTASIS

Our bodies are constantly regulating temperature, hydration, oxygen levels, internal pressure, etc. to keep the body in balance and achieve homeostasis—equilibrium with all of your physiological processes. Disturbances can result in feeling poorly, pain, and disease. CBD helps prevent these disturbances, by telling the Endocannabinoid System to produce cannabinoids.

WHY SHOULD I USE CBD?

CBD is rapidly transforming the world of wellness and creating a profound shift in the way we address health. The areas of the body impacted by CBD can make a dramatic impact on the way we feel and function. Research indicates its use in improving:

- Overall Wellness • Stress • Sleep • Pain • Anxiety • Inflammation
- Skin Redness • Skin Tone • Acne • Fine Lines • Radiance
